

Introduction

- Urban forests
- Managements
- Planning
- Materials and Methods

Pictures and graphs are property of Guyen Battuvshin

Urban forest

- Benefits of urban forest
- Clear structures
- Energy savings

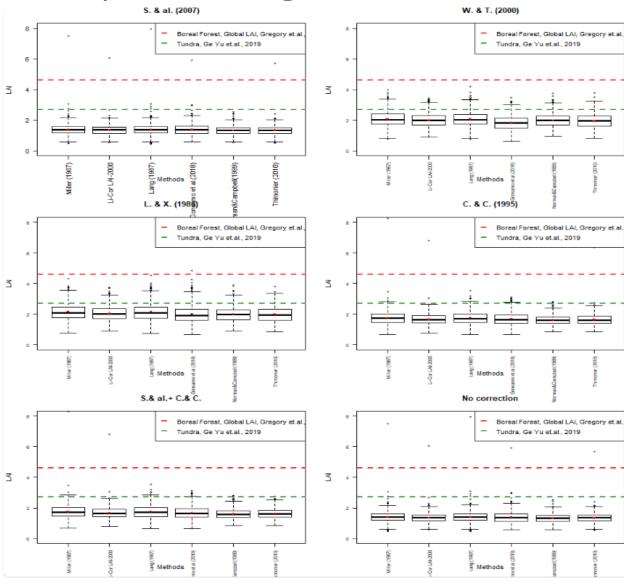

Managements: Forest and planning

- Proper investigations are needed
- Connection between urban and nature

Materials and methods

Generally, all the calculations are made in R studio and combination of other programs. Here I am presenting part of the possible pictures and graphs.

Six different and corrections are used to calculate forest parameters.
